

# B TYPE RADIATOR TUBE MILL

# MODEL:MPU-25

This is to manufacture B type radiator tube which increases the strength and improves the heat changing efficiency of the radiator tube with high quality and high speed. MORI meet the demand of the coming generation for radiator tube advancing further thin wall and light weight.

## Main Specification

Product:	A $\ell$ Tube for Heat Exchanger
Tube Size:	Max.2mm Width $\times$ 33mm Height 0.18~0.4mm Thickness
Material:	A $\ell$ Three Layers Clad Material
Weld Speed:	More than 120 m/min
Cutting Capacity:	More than 400 cuts/min
